Comments: Once again where is the full blown EA, that includes cultural, historical, recreationally, endangered species, habitat destruction or closure, and the list goes on?
Where was the notice for the entire state? We do not just recreate and work in our home counties in Montana. Bozeman is not the center of Montana's Universe.
The wildness of Montana is what keeps our recreational economy booming not a a bunch of tax evading millionaires who come in for long visits.
As to mineral rights absolutely not! Montana has a long history of giving away the minerals of the state to the robber barons of the past and present.
A proper EA must be done! Hope there is a group out there willing to sue!
