First name: Andy

Last name: Anseth

Organization:

Title:

Comments: USFS- what can you possibly be thinking that this will be good for native Montanans? Who is lining your pockets that this could be a possibility you'd consider? If this passes, the wealthy out of staters will have more authority over public lands that we are trying to maintain and retain access to. As a public land hunter, especially in the crazies, I've personally seen the degradation of what we know as our public land where we participate in the conservation of our elk herds, bear populations, and deer herds. The more you give to the wealthy out of staters, the less we have to pass on our way of life to our children, then what is to come for their children? If you pass this, and continue the back door deals with the wealthy out of staters who have no respect for our traditions and ways of life, you steal it from us, and our children. Enough is enough, Montana is not the playground for the wealthy.
