Title:

Comments: My family have hiked steens pillar many times over the last 18 years. Have helped assist search and rescue on that trail. Been out to the twin pillars and trimmed manzanita and cleared downfall. Traffic had increased. From 6 cars to 12 over that time. The population of Prineville has grown in spite of Les Schwab moving corporation headquarters to bend. With new trail systems added to Barnes butte and beyond. On any given day there are going to be many more people riding horses or atv's than mountain bikes in the area. I mountain bike as well as hike as does my family. Served in the military and believe the needs of family activities that this trail system will offer for equestrian and hiking and biking will benefit many in the local community. Visitors to Prineville are many long before this research to develop a safe, sustainable solution for this community. Thanks for all the folks sharing there opinions about this
