Comments: I oppose the land exchange in the Crazy Mountains. As usual the forest service is trading off our low elevation public land to developers in exchange for high elevation land that is difficult to develop.

I oppose the land exchange because the land being traded off is worth more financially in the Bozeman area hot real estate market, is worth more for wildlife habitat and is worth more for recreation useful for recreation more of the year.

The forest service should not function or do land exchanges at the behest of wealthy developers at the cost of rank and file Montanans and Americans.

The trade as most serves the rich and disenfranchises regular folks. Stop it now.
