Comments: I do not support the proposed Lemon Gulch trail system. Over the past 30 years, I have helped move cattle by horseback into and out of allotments in the area throughout the season. These folks with grazing permits have been required to follow a strict set of rules and regulations to reduce environmental impact.

With this proposal, I see the impact of infrastructure alone, a great significance. Who pays for the infrastructure? There will be a large increase in traffic down a quiet valley on a dead end gravel road.

Who will build these trails?

Erosion control?

Will there be a gate? And will it be closed when fire danger is high?

This is a beautiful area inhabited by all kinds of wildlife.

Thanks for allowing these comments.
