Comments: To the USFS: I have waited to comment until I found an editorial or opinion piece that I feel adequately explains the very complex land swap proposal in the East Crazy Mountains. This morning the Independent Record provided a guest editorial that more clearly explains the situation to me. I strongly oppose the proposed transaction and I feel that a further period of reevaluation and renegotiation is required. Once gone or further restricted, our public lands will be further diminished. I vote No for the proposal. Sincerely, Dr. V. Lee Harrison
