Comments: USFS,
I am strongly opposed to swapping public land in the Crazy Mountains so that the Yellowstone Club and private landowners can gain further access and privatize Montana's public lands for profit. If you do the acreage math in the lands swap proposal the Public loses acreage and water rights and private property owners gain substantially. In addition, public access to the Crazies is reduced even further by the restriction of public access. This entire proposal is biased in favor of private landowners, and this proposal lacks transparency and due process for public comment given the short time frame.

Dean Johnson,
Missoula, MT
