Comments: This proposal looks good on the surface but it does not when water and mineral rights are not included. Mining and timber harvesting could and will take place if this passes. Wetlands and lower land is an uneven swap as well. Trading an acre of low flat land is not equal to 10 acres of sheer mountainside land. Any new development in the Big Sky/Yellowstone Club area, an area that cannot contain its own sewage, will not benefit the citizens of Montana. I oppose this land swap.
