Comments: I would like to express strong support in favor of the East Crazy Inspiration Divide Land Exchange proposal. In addition to support of the proposal I also want to thank all of those involved who put in countless hours to bring this proposal to this point.

I know the area and how complicated the private land ownership/federal land situation is. I am very excited for the opportunity to have much clearer public access into this area. Reducing the confusion of land ownership which has created frustrations for the public and for local land owners, appears to be a win-win for all involved.

The new proposed connecting trail system and the opportunity for public access through contiguous FS land into the upper sweet grass canyon is a huge win for the recreating public.

Thanks for continuing to drive this proposal forward and for your consideration of my input.
