Comments: As an avid hunter and angler I fail to see how this exchange benefits Montanans like myself that rely on public access to public lands.
This measure will only serve to exacerbate access problems which I understand is the only reason this exchange is proposed.
In addition, we're giving up prime big game range and some decent fly fishing creeks for some ground better suited for marmots and blue grouse.
We don't need another opportunity to hike miles to a ridgeline only to glass groups of orange clad pay to play hunters drive right up and load elk killed in the best parts of the drainage. Forest Service resources would be better spent enforcing easements that have been conveyed with past land exchanges. I do not support this exchange
