Comments: I oppose the land swap being proposed by the USFS of land now owned by the Yellowstone Club, Big Sky area property with land in the East Crazy Mountains. It is good for the ranchers and perhaps other people of means, but it is a rotten deal for the People of Montana. We loose valuable wetlands that are vital to the survival of so much life. We loose valuable productive land and all our mineral rights.

What is the US Forest Service thinking? Why do we continually support the wealthy at the expense of Montana's working population? It seems like the new State leaders who lean far right are busy adding more wealth for the wealthy to exploit.

Please think about future ramifications for this unfair trade. The east side of the Crazy mountains will become more and more valuable for future generations as a place to recreate. We need many good access points into these spectacular mountains. This proposal will leave just one good access to head into the wilderness so many of us crave.

I beg you to think of the future and stop this money driven land swap.

Sincerely! Ann Wilsnack
