Comments: I am writing to express my support of Alternate Plan #2 of the Lemon Gultch Trail Project. The Ochocos are a favorite NF of mine, and an extensive trail network would give me many more options on where to mountain bike in central oregon. Currently, I have heard of people biking and hiking on areas of the Ochocos without a trail. To protect wildlife and prevent erosion in the region while providing good trail access to bikers, alternate plan 2 would do a great job. Furthermore, increasing the amount of beginner/intermediate trails in the region would make mountain biking safer for beginners and children
