Comments: While I do not disagree that there needs to be some work done in the Crazies to consolidate some lands, I do oppose a transfer that impedes travel, access, road access and habitat fragmentation. The Crazies are already a notoriously inconvenient range to access because of patchworked property rights, private ownership of access areas and the list goes on. I oppose this land swap, especially considering that the EA is lopsided to one side or the other, depending on the subject matter of the section. The EA needs to be all encompassing and it also needs to delve into every corner and make everything public for the world to see. The access will be greatly diminished and even though the area would get some needed attention, a long traverse into an area that is currently relatively easy to access is a terrible idea. Please reevaluate your EA and include all documents that show road status and other options. Thank you for all of your hard work.
