Comments: I support the Lemon Gulch trail proposal, and specifically Alternative 2, which best meets objectives of the LRMP to increase non-motorized recreation opportunities and associated miles of trails on the Forest. The issues raised during scoping and other resource concerns have been adequately analyzed and addressed through the NEPA process. Alternative 2 will result in a trail system that includes options for all levels of mountain biking ability, and the trail mileage is long enough to allow for a full day of riding.
