Comments: Dear Slater Turner and the Ochoco National Forest,

I strongly support development of the Lemon Gulch trail proposal. As a citizen of that state that enjoys spending time in our outdoor places and spaces I have travelled to the Prineville-area to recreate in the Ochoco National Forest specifically for its mountain biking opportunities. While that experience was amazing, the type of riding typical in the area currently (Round and Lookout Mountain areas) provide a more backcountry-focused experience that may not be desirable or appropriate for all users. I support Alternative 2 for the development of full mountain bicycle-specific trail network that would be the most inclusive for a wide range of current and potential new users, while focusing that use in a small management area.

Respectfully,

Adam Steffen
