Comments: This proposal should be rejected. This would allow the Yellowstone Club to expand which is not in the best interest of the Gallatin River and would increase traffic on the already busy highway between Big Sky and Bozeman. What would this do to the already degraded water quality In the Gallatin River? Has a full environmental study been done showing the impact the the river, traffic, congestion, quality of life, etc...?

Apparently money and political influence matter to the Forest Service to allow the Yellowstone Club to get what it wants. How much has the Yellowstone Club spent to date trying to push this through? The public should come first not the super rich.

The timing is also a concern. The public is not well served by taking public comment around the holidays when they are busy with family and friends.
