Comments: To whom it may concern,

I strongly support the Land Exchange #63115. All impacted parties favor the exchange and it provides improved access to the public, allow private landowners to better manage and protect the land against wildfires, invasive weeds and to better manage grazing. The land owners involved are all multi-generational ranchers who have placed responsible stewardship of the land above all other considerations. These are exactly the type of families who will protect and enhance the land for generations to come.
