First name: MBM Livestock - Gordon

Last name: Bulloch

Organization:

Title:

Comments: As a Livestock producer we would like to comment on the impacts as producers and livestockman that this could have on our operation. We realize the potential good that can be gained but it could cause hardship financially. If there is no pasture for us to go for the rest period. We have recently had to stay off 2 years for the bullhog treatment and previous reduction for drought over the years and then with increased prices in hay and the Livestock market not as strong this could have a huge impact on us. It is hard to see the exact areas that this project would affect, but if it is within our grazing allotment we do have concerns. We would like to be notified and apprised of any further details on this project.

Thank you Sincerely

Gordon Bulloch
