Comments: What years were the Class III surveys completed on the federal parcels and were they completed with tribal consultation? Understandably, if the surveys were completed more than twenty years ago without tribal participation, then it is highly likely that sites of religious and cultural significance to tribes may not have been properly identified, if any. The Northern Cheyenne THPO looks forward to continued consultation to discuss potential opportunities to completed the endeavors mentioned in the document, as well as working with and supporting tribes to commit to protecting such resources.
