Comments: Hello,

The following are my comments regarding The East Crazy Inspiration Divide Land Exchange Preliminary EA:

Analyze impacts of "reasonably foreseeable" development on wildlife, habitat, and cultural resources on all lands that would become private post exchange;

Ensure that important habitat and cultural sites are protected with permanent deed restrictions or conservation easements preventing residential, commercial, industrial, and mineral development;

Reserve public and administrative access or any existing easements on Sweetgrass Road and Trail.

Provide clarity on how, when, and where permission can be obtained for accessing Sweetgrass via Rein Lane.

Conduct deep and inclusive engagement and consultation with all regional Indigenous Nations that identify as being connected to the Crazy Mountains.

Preserve and enhance the quiet, undeveloped, unroaded characteristics of the Crazy Mountains by taking steps towards the permanent designation of the South Crazy Recommended Wilderness, Crazy Mountains Backcountry Area and the Crazy Mountain Inventoried Roadless Area.

Consider alternatives that allow for the Eagle Park and the riparian public lands in Sections 8 and 10 to be retained or exchanged for lands with comparable ecological and recreational value.
