Title:

Comments: This area has been mined for decades and the area is just now starting to recover. I know there is no stopping this at this point because of the money and politics behind it. But, I beg that this gets shut down. I am local and I have seen the impact that mining on this scale has. It saddens me that we never truly learn from our mistakes. Do what you will, but know that it is not right. I understand that that if we don't mine it we don't have it. My degree is in geoscience. I am not anti-mining. I'm simply saying that this area has had enough and it's time to stop. This is about money...that much is clear.

Cheers,

-Justin
