Title:
Comments: I reject this proposal because:
It does not preserve permanent public access to Sweet Grass Trail and lower drainage;
It gives mineral rights to private interests on recreational public land;
It gives up water rights on public lands;
It swaps too much land in accessible areas for unaccessible areas;
It closes off important access to the eastern Crazies;
It does not provide public review of improvements;
Voluntary cooperation by private owners is necessary for public access to critical areas "offered" in the swap;
It looks like Forest Service corruption by powerful private interests.
