Comments: I fully support the proposed land exchange in the East Crazy Mountains. To me this represents a truly successful solution to a long standing problem that deserves to be fixed. I applaud the various groups and interests that worked together to solve the complicated land and access issues that have been kicked down the road for far too long.

For those groups or individuals who oppose this land exchange, I hope that you will reconsider your opposition. There will never be a "perfect solution" that meets everyone's expectations.
