Title:

Comments: Our Idaho tradition and culture is founded in our wild areas. Fishing, hunting, and being outdoors is a big part of us. This mines threatens our fish wildlife and our ability to enjoy parts of Idaho that are precious to us.

I know that the mine is also important. How do we take care of both our wild places and build this mine?

Please be mindful in this project. Know that the fragile ecosystem and the world at large depend on your conscious efforts to care for those beings that can't advocate for themselves.
