Title:

Comments: I support the rerout of the trails at Boggy and the creation of the extension of the 14th Street trail to the system. In addition I would like the trails to be kept in shade whenever possible by leaving trees protecting the trails uncut providing a buffer of some distance. I support the project of forest thinning and look forward to a quality job with forestry supervision that protects the recreational uses at Boggy. I personally have a great investment in the trails at Boggy. The recreational activities there are a great asset to the county and the town of Dolores. Please keep the protection of the trails in mind while making plans for the needed logging project.
