Comments: As a avid Hunter, Outdoorsman and general recreational enthusiast I love the ideas of this we'll put together plan. I have spent a very small amount of time in the crazy mountain area because of the lack of acres and the problems that are being addressed in this deal. I am a huge proponent of getting more land for the public no matter what. I think this absolutely great for the crow tribe also. This land was previously inhabited by them and throughout history it has now fallen to privatizations. Which has become a burden to get back to the people. I applaud the actions to return at least good access to the people!
