Comments: I support the parking and trail improvements proposed for Boggy Draw. I have been a volunteer with trail building projects on Boggy Draw for many years. I have enjoyed hiking and biking in this area since 1995 and I have seen visitation numbers grow as more people are drawn to this area for recreation, camping and to explore the trails. Having a single track trail to connect the town trail to Bean canyon will greatly improve the safety and appeal of this trail. I would like to see the new parking areas fit into the natural forest landscape and not be just rectangular dirt lots. Being able to park cars in the shade in summer under the trees will be a big plus in designing the parking areas. The bathroom vault at the main Boggy Draw Trail head is much needed. A vault toilet at the Tava or String bean junction should also be considered as I have seen campers will often drive from their camp sites in the forest to use vault toilets. Thank you for considering these improvements.

Regards,

Bill Hatcher
