Title:
Comments: The Yellowstone Club gets a complete round trip trail around the Crazies from the "town they own". The general public looses any day use of American Fork and Sunlight Lake area from the East side. Us unable to hike the long trail from Half Moon to American Fork loose this area. The Western Strategies and Jim Peterson is a firm out of Washington D.C. hired to market this fiasco. What is in this for the general recreating public? Maybe open the prior access to American Fork would make this feasible. Day use to American Fork and Sunlight Lake will only accessible from the West side via Shields River and Sunlight Creek. It seems to me you are bowing to the interest of a few land owners and not the general public.
