Comments: Comments on East Crazy Inspiration Divide Land Exchange

I am against this proposed land exchange because it will not solve the public access problems in the Lower Sweet Grass drainages of the Crazies. The U.S. Forest Service proposes to trade lower elevation elk and big game habitat for rocks, a parking lot and a trail that is basically unusable. No landowner would make such a lopsided land exchange.

The proposed 22-mile access trail from Big Timber Canyon does not provide adequate public access. I don't know of anyone who would walk 22 miles to get to an area where the landowner next to it can drive close to it with a vehicle.
