Comments: I strongly oppose the East Crazy Inspiration Divide Land Exchange #63115. This land swap would be a big loss for the public, and a big gain for private owners. As a hunter and an angler, I am concerned about access to public land and this deal would make accessing that land nearly impossible. As a concerned citizen, I am interested in maintaining public assets in public hands, and this proposed land swap would transfer federally held mineral rights into the hands of private parties. This is not a land swap, it's a land grab. Just say no.
