Comments: To Whom It May Concern:

I strongly oppose the East Crazy Inspiration Divide Land Exchange and encourage you to re-evaluate and address the problems with this exchange such as the current Travel Plan, lack of disclosure of the monetary value of land exchanged, severed water rights, loss of wetland acres, loss of public access, etc. Furthermore, the USFS and other state entities should not be engaging in vague, back-door deals with private entities such as the Yellowstone Club and Western Lands Group (or any businesses or individuals that are only looking out for themselves). The USFS should be helping to protect public land access, critical wetlands, and wildlife habitats.

Thank you.
