Comments: I am writing in support of the public access to the crazy mountains. I had heard about this a while back and I was fascinated that public access was blocked by private land. That can't be right. I believe the alternative b plan will allow for more public access to our natural resources. We must protect and keep sacred the wild lands and at the same time allow our citizens the ability to appreciate its splendor.

Thanks for this work. I look forward to hearing the outcome.
