Title:

Comments: As a living and self aware entity that, like most mammals on the planet, requires a safe and clean source of drinking water to survive: I am strongly against this pipeline. There is no way to absolutely guarantee its safety. There is no way to guarantee that the residents who drink the water that would inevitably be affected by the pipeline bursting would have access to adequate and timely medical care, in the case of such an event.

Unless the company building this pipeline is willing to guarantee, in writing and in no uncertain terms, that they will be solely responsible for correcting any damages done to the environment or to the human beings in it, there is no way in hell that it should be built.
