Title:

Comments: I mountain bike and walk the Boggy Draw trail system routinely. I appreciate the agency's commitment to multiple use, including logging. I hope the proposed project can be undertaken with minimal or no adverse impact to existing recreational uses. That includes minimal disruption to flora and fauna. Boggy Draw is a special place. We so enjoy riding and walking through the trees and scrub brush, as do so many people who support the local economy. When constructing new roads, parking lots and associated infrastructure, please do your best to avoid disruption of the existing ecosystem. Please leave trees and brush clusters as much as possible, particularly near roads and parking areas. Please keep the areas looking as natural as possible.

I support rerouting trails that would conflict with necessary and approved new road routes. The trail reroutes should be constructed as soon as possible and prior to the start of any logging project. I am committed to volunteering with SWCCA to construct approved new routes.

Thank you for your consideration.
