Title:

Comments: Request a 45-day extension of the not sufficient 75-day public comment period-for a total of 120 days-for the Stibnite Gold Project Supplemental Draft Environmental Impact Statement (SDEIS).

The project impacts resources of high public interest, including ESA-listed fish, the Frank Church River of No Return Wilderness, rivers that are eligible for Wild & Scenic River designation, Roadless Areas, and extensive ecological, cultural, and recreational resources.

Even with reclamation efforts, the mine site will bear the scars of extraction for generations to come. Contamination may persist in soil and aquifers for lifetimes. After many years of growth and replanting, the access roads and footprints of support facilities will continue to be noticeable and out of place within the broader landscape

Hold the Forest Service accountable to continue Caring for the Land and Serving People., " and ensuring the FS has sufficiently detailed information to make a reasonably informed decision and encouraging public participation in the development of that information
