Comments: NO TO STIBNITE MINE!!! Any human that would be in favor of developing a gold mine near a pristine free flowing river is a god damn Disgrace!! Any kind of mining inevitability leads to some form pollution. If the mine is near a river that pollution flows downstream. If that river is one of the headwater tributaries of our major water ways then we are polluting the entire water supply and harming every living organism along the way. DO NOT DEVELOP STIBNITE MINE!!
