Title:

Comments: This mine should not happen. The government and agencies involved need to consider alternatives. If you truly wanted to save what little woodlands and untouched rivers we have, like the forest service is supposed to stand for, this mine would not even be an option. Myself and everyone else disagree and disprove this mine. This mine would be built on greed with no regard for nature. Thanks for "doing your job" and sticking up for nature. It's not like they can speak for themselves you're just killing them off.
