Title:

Comments: This is a disgrace to even consider. Protect habitat for native trout and stop the greed. It's embarrassing and repulsive. As a fishing guide, I rely on protection and conservation of areas such as this. Keep it safe and protected for years to come to build economy and preserve these natural areas. One flash in the pan mine is not worth years of fallout and eventual clean up costs. Have we not learned from our past mistakes? We're better than this
