First name: Maxwell

Last name: Lewis

Organization:

Title:

Comments: Just for extra measure, multiple comments over multiple years. This cannot happen for the sake of our ecosystems, economy, and future generations. As a 10th generation Idahoan on both sides of lineage, I hope to share the south fork with my children and their children. We should be working on returning the salmon and steelhead populations and bull trout population, not killing them off with the same issues that have destroyed this space in the past.
