Comments: I am writing in firm opposition to the Stibnite Gold Project EIS #50516. Simply put: Reject the Stibnite Gold Project. Forever. This plan would be a mistake that can never be corrected. Do not allow this public resource to be destroyed by a mining plan that is so outlandish it is, in reality, laughable at best. The proposed Stibnite Gold plan places endangered salmon populations and wildlife at incredible risk. The proposed Stibnite Gold plan places recreation in this public resource at incredible risk. I am concerned the Stibnite Gold plan would negatively impact the economic benefit of Idaho's recreation industry, an industry that is sustainable and renewable. Mining gold on Idaho's public lands is not renewable or sustainable. It is destructive and leaves scars that never heal. How many other examples do we need to cite to know the Midas plans will ultimately fail? And for what? Gold? Please. The Midas/Perpetua plan will destroy this landscape and the river ecosystem forever. Please reject the Stibnite Gold Project EIS #50516.
