Comments: Road construction and mining operations would cause serious impacts to the River of No Return Wilderness, including noise audible from a nearly 2-mile radius, wildlife disturbance and displacement, increased access to and activity in what are now quiet and lightly-visited places in the Wilderness, and sediment pollution in streams within the Wilderness. The wilderness evaluation erroneously downplays impacts.

Also, a new road would be constructed along a ridge that forms the boundary of the Wilderness. And, while the Supplemental Draft Environmental Impact Statement (SDEIS) alleges the road would be 100 feet from the wilderness boundary, the most logical location for the road seems to be an existing pack trail that dips into the Wilderness.

I urge the Forest Service to deny the mine permit and require Perpetua to finish cleaning up the mine site. It is worth noting that the Nez Perce Tribe has been actively working to clean up the South Fork of the Salmon and has challenged this mining proposal. The last thing the area needs is more toxic mining pollution and all other harmful impacts.
