Comments: Any other "preferred alternative" than denying the permit for Perpetua Resource's Stibnite Gold Project & requiring Perpetua to FINISH CLEANING UP the mine site is assinine!

This is a Wilderness - the damage to the river & fish - the amount of water necessary for this mine to operate - the destruction of habitat and wildlife - should make it obvious the last thing this area needs is more toxic mining, wildlife disturbance & displacement.

This country - this planet - needs more wildlife habitat - not less.

The lack of water & the droughts in far too many areas make clear this kind of "project" needs to be prevented.
