Comments: As part of the Department of Agriculture, it falls to the Forest Service to promote and protect public lands and forests. Each day, we lose natural habitat to roads and building projects. I urge you to deny the Sibnite Gold Project the right to encroach into wilderness and US protected forested lands. We must guard such areas for generations to come and to protect the life that already calls this region home. We must not destroy the areas in our Nation which supply places of spiritual regeneration and habitat for wildlife.
