First name: Pamela

Last name: Goodman

Organization:

Title:

Comments: Do not allow the Stibnite Gold project to go forward. The damage to this vital habitat will be unrepairable. The rivers will be damaged and the habitat will be destroyed. The Native Americans lives will be endangered by the pollution of the water and the land.

They were stopped once and there is not need for this to happen all over again. A lot of work and money went into restoring and protecting this land. Do not allow it to happen again!!!
