Title:

Comments: To whom it may concern, This is an area I have greatly enjoyed. Please do not allow any further mining and destruction of this increasingly rare, truly wild and beautiful area. Strip mines are a terrible idea and destroy our precious land. I'm not sure if you are familiar with the waste and destruction strip mining caused in West Virginia...please don't let it happen here is this beautiful area. Thank you

Listed below are a number of reasons others have mentioned for not doing this:

The Stibnite Gold Project puts not only the famed Frank Church-River of No Return Wilderness at risk, but also the East Fork of the South Fork of the Salmon River and endangered species such as salmon, steelhead, and bull trout.

Under the preferred alternative, road construction and mining operations would cause serious impacts to the River of No Return Wilderness, including noise audible from a nearly 2-mile radius, wildlife disturbance and displacement, increased access to and activity in what are now quiet and lightly-visited places in the Wilderness, and sediment pollution in streams within the Wilderness.

The wilderness evaluation erroneously downplays these impacts.

The new proposed road would sit 100 feet from the wilderness boundary or could even enter the Wilderness, as the most logical location for the road seems to be an existing pack trail that dips into the Wilderness.

The last thing this area needs is more toxic mining and associated impacts.

The Forest Service needs to deny the permit for Perpetua Resource's Stibnite Gold Project and require Perpetua to finish cleaning up the mine site.
