Title:

Comments: Deny permit for Perpetua Resources' Stibnite Gold project which will cause toxic mining pollution in the Salmon River and River of No Return Wilderness. The mining will negatively impact salmon, steelhead and bull trout, as well as create wildlife displacement through road construction and the use of hazardous vehicles.

The nature of Wilderness needs to be protected. Deny a mining permit, which will impact 30,00 acres of the River of No Return Wilderness plus many associated streams.

Thank you for your attention to my comments.
