Comments: I oppose the Stibnite Gold Project. Perpetua Resources strip mine proposed in the Payette National Forest is a taxpayer funded plan for a few private individuals to get rich.

When will rights of the people of this country come before the few ultra-rich who use public lands to turn their profit? When will extremely toxic by-products, dumped on public lands, become so shameful that for-profit companies change their processes? At what point will we poison our food sources out of existence and have nothing left to eat?
