Comments: To Whom it May Concern,
I am uncategorically opposed to the Stibnite Gold Project. The more I read about this the more it sounds like an evil plot in a Science Fiction movie.  Expanding mine pits for a proposed cyanide vat leach gold mine, that puts wilderness at risk. We are living in a time period that finds increasing environmental dangers every day. We need to think about our children's future and the future of our imperiled planet, not place more problems there. Please finish cleaning up the old mine site and do not fail further into folly for the future!
Thank you for considering my viewpoint,
Sincerely,
Karen Anderson
