Title:

Comments: Hope you fulfill your responsibility: many trust the Forest Service to faithfully protect our wilderness, the flora and fauna, including waterways and their inhabitants, as well as the general well being of all creatures and plants, trees, etc living in the sensitive areas under consideration.

The wilderness evaluation erroneously downplays the following impacts (among others!)

->The last thing this area needs is more toxic mining and associated impacts.

->The new proposed road would sit 100 feet from the wilderness boundary or could even enter the Wilderness, as the most logical location for the road seems to be an existing pack trail that dips into the Wilderness.x

The Forest Service needs to deny the permit for Perpetua Resource's Stibnite Gold Project and require Perpetua to finish cleaning up the mine site.
