Comments: The Stibnite Gold Project will unnecessarily put at risk the Frank Church-River of No Return Wilderness as well as the East Fork of the South Fork of the Salmon River and its endangered salmon, steelhead, and bull trout. Without question, road construction and mining operations would cause serious impacts to these areas, wildlife disturbance and displacement, and sediment pollution in streams within the Wilderness.

These impacts are wrongly downplayed in the evaluation.

The last thing this area, let alone this planet, needs is toxic mining and its vast ripple effect.

The Forest Service must deny the permit for Perpetua Resource's Stibnite Gold Project and require Perpetua to finish cleaning up the mine site.
